

is a starting point for your success

**WHITE PAPER PUP BINANCE
SMART CHAIN**

www.pupcoine.com

INTRODUCTION

What is PUPCOIN?

PUP is a decentralized meme token on Binance Smart Chain which is going to be trended in the crypto world very soon. It will be traded with low fees so that nobody lefts to be involved in this project. PUP is on a mission to bring popular cryptocurrency concepts to the mainstream in one, easy to understand project.

PUP is in it for the long haul. The decentralized community is fostering long-term development of the ecosystem which will result in real use cases, greater rewards and a popularity beyond any temporary trends.

We believe that community is the commerce of the future. Imagine a tokenmunity coming together with the singular common focus of increasing the wealth of every- one involved! The blockchain is the perfect mechanism to allow this to happen. Talk about a dream come true!

These are the reasons why we had to create, develop and launch the PUPCOIN

PROJECT & VISION

Most of the people who deal with cryptocurrency are here to make money, wondering about earning huge income. And this is quite understandable.

However, there is a good point that is often neglected - coins or tokens without strong support for the project are unlikely to reach. That's why we're here - to make this real. We have combined large, real token projects with use cases. Our roadmap is a unique invention - we define stages not by timeframes, but by a lead value system! We will provide new projects without killing, so that more and more people trade our token.

The PUP TEAM has laboured tirelessly to summon tokenomics that grant the wishes of his faithful followers. PUPCOIN offers a selection of delightful tokenomics, both healthy and decadent!

Advantages of the Binance smart chain

Binance smart chain is well known for less gas fee and speedy transactions. It's a sovereign block-chain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

HOW PUPCOIN TOKEN WORKS?

PUPCOIN memes token is designed

In a way that encourages long-term investment through its tax system and provides passive income

How PUPCOIN memes passive income bonus works ?

PUPCOIN provides passive income on Busd

For token holders, from every buy/sell, 5% of the amount is divided among all holders depending on what is available in their balances. You don't need to participate in it. Simply keep the 50+ million tokens you automatically receive in your Busd wallet every day. You can monitor this.

Ecosystem

The Buy tax is 8% and the sell tax is 10%. Taxes are a crucial role in developing the project, as they provide liquidity and burn 5% from each transaction.

Which makes our token highly deflationary and supports the price with funding secured for the roadmap phases

Passive income for its holders: 5% of every buy and sell transaction

goes directly to them

This action motivates people to keep it for the long term which is good for everyone

www.pupcoine.com

What is cryptocurrency burning?

In the cryptocurrency industry, a burn is a deflationary mechanism .used to permanently remove coins from circulation

Most cryptocurrency projects including PUPCOIN burn cryptocurrencies to preserve the value of their digital assets and create .a deflationary effect

PUPCOIN uses two token burning mechanisms, manual and automatic

Manual burning is the major burning events at every stage of the road

As for the automatic mechanism in our tax system

From every buy transaction, 2% is burned, and from every sell .transaction, 3% is burned, which goes directly to the dead wallet

This strategy ensures that the number of coins in the PUPCOIN token is constantly decreasing, which contributes to the currency's .scarcity and value

:In terms of safety

Investor safety is the team's priority and they are always willing to ask your questions

Anyone can come to the chat. <https://t.me/pupcoin99> and ask their questions. For the safety and security of contract holders, liquidity is secured. Locked liquidity is one of the most important measures because it makes money immovable. This means that developers cannot withdraw liquidity, giving investors a sense of comfort regarding their investments. As long as it is closed, no one can access it, it cannot be moved, pulled, Pull the rug out of her

Token Distribution

- Marketing : 3.2%
- Airdrops: 5.2%
- CeX listings : 8.1 %
- Development : 8.1%
- Dex public sell : 18.2%
- Burn events : 57.2%

Road map

Road To Success

stage 01

- social media
- Coin launc
- website
- Community airdrop
- holders 1000
- white paper
- Presale
- Coinmarketcap/ Coin Gecko Listings

stage 02

- Marketing and advertising holders 3000
- Burn occurred
- create localized community for specific regions Chinese/ Turkish / Spanish /) (Arabian
- Audit and KYC

stage 03

- Burn occurred
- Launch of the Ethereum network
- Dex Uniswap
- holders 5 MC 6000
- Community airdrop
- Expand Marketing + Development team

stage 04

- Great marketing campaigns and social sharing
- holders of 10 MC 10,000
- Discover global stock exchanges kucoin Gate io bitmart
- New roadmap update

NOTE: IN THE FOURTH STAGE, THE TAX WILL BE COMPLETELY ABANDONED, AND A SINGLE TAX OF 0.25% WILL REMAIN THAT BURNS THE TOKEN CONTINUOUSLY
